

Lavasept

Combination Acid, Clinging Toilet and Restroom Cleaner

Lavasept is a rich, cling-type lavatory cleaner with a high concentration of selected acids, detergents, and corrosion inhibitors. *Lavasept* will make fast work of removing the toughest stains, rust, lime-scale deposits, and other soils on toilet bowls, urinals, glazed tile, and shower stalls. This premium formulation will clean, deodorize, and remove mold stains. Its built-in inhibitors prevent corrosion of pipes, drains, and fittings, making it safe to use on all porcelain, fiberglass, ceramic tile, and most metals when used according to directions. It is non-fuming and will not interfere with septic system operation.

APPLICATION & MAINTENANCE

When used as directed, *Lavasept* will not damage fiberglass, porcelain, vitreous ware, ceramic tile, or grouting.

TOILET BOWLS: It is not necessary to remove the water from the toilet bowl. Apply 1 to 2 ounces to applicator holding, over bowl or urinal. One to two ounces is normally sufficient to remove soils, rust, lime, scale, uric acid, and to deodorize. Apply a stream of *Lavasept* underneath the entire bowl rim and allow it to run down and coat the inside of the bowl. Wet bowl mop in solution in bowl and swab all surfaces. Flush and rinse. Rinse applicator.

TANKS: Add one ounce to tank water and clean entire inside surface with a bowl mop and flush toilet.

URINALS: Place bowl mop over drain and add 1 to 2 ounces of *Lavasept* with enough water to make a solution. Follow the same application procedures as for toilet bowls.

FIBERGLASS TUBS, SHOWER STALLS, CERAMIC TILES: Dilute 1 to 2 ounces to a gallon of water and apply with a mop, brush, or bowl swab. Heavier soiling may require a higher concentration. Rinse thoroughly. Do not use on marble.

SPECIFICATIONS

Active Ingredients	35% Dodecylbenzenesulfonic Acids, Isopropyl Alcohol, Hydrogen Chloride, Methyl Salicylate
pH	1 - 3
Free Ammonia	None
Free Alkali	None
Free Acid	48%
Phosphates	None
Abrasives	None
Color	Milky Green
Odor	Wintergreen
Solubility in Water	100%
Freeze/Thaw Stability	3 cycles
Shelf Life	1 year min. (30° F.-125° F.)
Flash Point	None
Weight Per Gallon	9.5
Biodegradable	Yes
Soil Suspension	N/A

SAFETY INFORMATION

Read Safety Data Sheet thoroughly before using.

CORROSIVE DANGER: Harmful or Fatal if Swallowed. Causes Chemical Burns.

Contains Dodecylbenzenesulfonic Acid CAS #27176-87-0, Hydrochloric Acid CAS #7647-01-0, Sulfuric Acid CAS #7664-93-9, Isopropyl Alcohol CAS #67-63-0, and Methyl Salicylate CAS #119-36-8.

IMPORTANT: This is a concentrated product, use according to instructions. Do not spill or splash. Rinse accidental spillage promptly. Do not use on any surface that is not guaranteed acid-resistant. Safety glasses, gloves and protective clothing should be worn during application and handling. **FIRST AID:** In the event of skin or eye contact, flush area with water for 15 minutes. If skin irritation occurs seek medical treatment. In the event of eye contact or ingestion, seek immediate emergency medical treatment. Possible Organ Effects: Eyes, Respiratory System, Upper Gastro-Intestinal Tract, Skin.
